

30. (New) A method of operating a game comprising:
- wirelessly receiving data from a controller by a processor executing the game;
 - determining an age of a game player using the data; and
 - either allowing participation in the game based at least in part on the age of the player, or adjusting the game based at least in part on the age of the player.

The Examiner is invited to telephone Applicant at (208) 331-4537 to facilitate prosecution of this application.

Respectfully Submitted,
Russell D. Slifer
